Cally,

I apologize for giving you so much information so quickly, but I want you to have whatever source materials as may be of value to you.

We pulled a few more things together for you. The first attachment has short descriptions for all the objects and features listed in the proclamation (the list I sent Monday evening). The objects and features are not all shown on the briefing map I sent you along with the list. We can discuss with you which ones you would like to see on the map.

The second attachment is a list of the historic and scientific objects (geologic, paleontologic, biologic, etc) that have been identified on the monument along with their location and the source that identified the objects.

The third attachment is a bibliography of publications that address monument resources. I believe this is a supplement to the bibliography contained in appendix C of the Proclamation.

I will be sending you a map shortly that includes the WSAs, LWCs, Oil and Gas and Coal leases in 1996 (this is a proxy for mineral potential, as we are still looking for a good source). We can't really put paleo or cultural information on this overall map because it will get too complicated to read.

I will be tied up at the Utah Recreation summit until about 4 pm your time. My cell is dead so I will be calling you as soon as I get back to the office. I could have my GIS person on if that would help. Thanks you. ed
